

MAYSI-2 Research Classified

The following list of journal publications using the MAYSI-2 is classified according to research questions that the studies address. All are studies involving data collection to test hypotheses. All involved adolescents in the age range of 11-18. All data were collected in juvenile justice settings: arrest/intake probation, pretrial detention, juvenile corrections, or juvenile justice psychiatric units. The list includes one unpublished dissertation study because of its large sample size (Maney, 2011: 54,716). The other largest data sets included 70,423 from 19 states and over 90 facilities (Vincent et al., 2008), and 18,607 in one state (Cauffman, 2004). The remaining studies had sample sizes ranging from 29 to 7,746 (average = 1,336).

This list of articles is “unselected.” It describes studies that demonstrate both strengths and weaknesses of the MAYSI-2 scales. As with any psychological tool, the MAYSI-2 cannot be described simply as “reliable” or “valid.” It is highly reliable and valid for some populations and when used in some settings, but it is less so for others, and this distinction varies for different MAYSI-2 scales.

Relation of MAYSI-2 to Conceptually Parallel Validated Tools and DISC-Based Diagnosis

Archer, R., Simonds-Bisbee, E., Spiegel, D., Handel, R., & Elkins, D. (2010). Validity of the Massachusetts Youth Screening Instrument-2 (MAYSI-2) in juvenile justice settings. *Journal of Personality Assessment, 92*, 337-348. doi: 10.1080/00223891.2010.482009

Butler, M., Loney, B., & Kistner, J. (2007). The Massachusetts Youth Screening Instrument as a predictor of institutional maladjustment in severe male juvenile offenders. *Criminal Justice and Behavior, 34*, 476-492. doi: 10.1177/0093854806291711

Chapman, J., & Ford, J. (2008). Relationships between suicide risk, traumatic experiences, and substance use among juvenile detainees. *Archives of Suicide Research, 12*(1), 50-61. doi: 10.1080/1381110701800830

Grisso, T., Barnum, R., Fletcher, K. E., Cauffman, E., & Peuschold, D. (2001). Massachusetts Youth Screening Instrument for Mental Health Needs of Juvenile Justice Youths. *Journal of the American Academy of Child & Adolescent Psychiatry, 40*(5), 541-548. doi:10.1097/00004583-200105000-00013

Hayes, M., McReynolds, L., & Wasserman, G. (2005). Paper and voice MAYSI-2: Format comparability and concordance with the Voice DISC-IV. *Assessment, 12*, 395-403. doi:10.1177/1073191105280359

Tille, J., & Rose, J. (2007). Emotional and behavioral problems of 13-to-18-year-old incarcerated female first-time offenders and recidivists. *Youth Violence and Juvenile Justice, 5*, 426-435. doi: 10.1177/1541204007300355

Wasserman, G. , McReynolds, L., Ko, S. , Katz, L. , Cauffman, E., Haxton, W., Lucas, C. (2004a). Screening for emergent risk and service needs among incarcerated youth: comparing the MAYSI-2 and voice DISC-IV. . *Journal of American Academy of Child and Adolescent Psychiatry, 43*, 629-639. doi: 10.1097/01.chi.0000116742.71662.b1
